Guardian 1.8 Cable Seal

The Guardian Cable seals are used on containers, hoppers, valves, storage units and truck doors. The adjustable loop diameter provides a wide application range and the flexibility to secure most any type of hasp. Guardian seals provide a quick, easy, economical, tamper resistant security solution.

APPLICATIONS

- Totes
- Freight containers
- Gates
- Railroad freight and tank cars
- Storage units
- Truck doors
- Inspection Doors
- Weights & Measures
- Valves
- Chemical & Oil transport
- Air Cargo
- Fisheries & Wildlife
- Law Enforcement
- Utility Meters & Cabinets
- Hazardous Waste
- Loss Prevention

FEATURES

- Rustproof Poly Coated housing
- Tool-less application
- Strong galvanized steel cable provides durability and strength
- Flexible sealing capabilities: can seal uneven or bent locking mechanisms
- Small diameter cable fits most applications
- Loop diameter can be adjusted to any size
- Easy to identify colors for quick identification
- Provides quick, secure anti-pilferage protection
- Recyclable materials
- Stock seals are laser engraved with unique sequential numbering
- Plastic coated housing helps prevent scratching of painted or polished surfaces

SPECIFICATIONS

- Plastic coated steel housing with galvanized steel cable
- Non-preformed cable—frays when cut to prevent tampering and prevent reuse
- Cable diameter: 0.07" (1.8 mm)
- Laser Engraved
- Numbering: Sequential
- Average breaking strength: 500lb
- Stocked in Red, Blue, Green
- Custom printing optional

LOCKING INSTRUCTIONS

- Place loose end of cable through opening of item to be sealed
- Insert cable end into opening of seal body to engage self locking mechanism
- Secure the seal by pulling cable until tight
- Record seal number and seal color as required

REMOVAL

- Verify serial number and integrity of security seal
- While wearing proper safety equipment, shear cable with cable cutter & remove
- Dispose of used cable seal properly
